

ANGLE BAR SYSTEMS

WPM Angle Bar Decks and Ribbon Shifters

WPM AngleBar™ Systems provide the capability to slit any web, invert the ribbons, stack and shift and interleave ribbons in either a 90° or straight out configuration.

WPM AngleBar Systems are custom made to fit the specific application, from simple ribbon or web shifting to complete AngleBar and Outfeed sections for multiple ribbon manufacturing.

All WPM AngleBars are manufactured using hardened driven rollers with pneumatic nip trolleys, black anodized web lead rollers and either driven or crush type slitters.

All Outfeed sections have full page linear compensators and driven draw rolls.

The RibbonShifter series of AngleBar systems incorporates many of the basic features of full AngleBar systems, however the shifting is more specific and dedicated. These systems are very useful in compact lines and lines that are product specific.

The use of WPM AngleBar Systems can help increase overall productivity, providing the ability to run simple jobs stacked and delivered as a single stream, or help to create new imaginative product designs.
